

HireLabs
Webinar
“Recruitment during the Recovery”
A HireLabs Press Release

October 23rd, 2009

HireLabs partnered with Mihnati to launch a Webinar on 21st Oct. The Webinar discussed issues relating to Recruitment during the recovery. HireLabs and Mihnati have been collaborating to address issues including helping people achieve their career objectives and how to make the best use of technology to assist HR managers and recruiters.

Saleem Qureshi – President and COO of HireLabs demonstrated how their product - ProfileSense™ - enables recruiters, staffing agencies and job portals to effectively and accurately screen applicants in the shortest time possible. When using ProfileSense™, recruiters and HR managers can effectively reduce their screening time by at least 40% and more importantly they can save their administrative costs by 20% in the recruitment process.

For the first time HR managers and recruiters are able to custom develop assessment tests which address the needs of their local element. This unique feature differentiates HireLabs from all other players in the talent assessment field.

Hr managers and recruiters can now purchase HireLabs services from Mihnati.
